1. The following is an examiner's statement of reasons for allowance:

The reasons for allowance of the claims is that none of the prior art of record disclose or suggest a method for diagnosis of bacterial exacerbations of chronic lung disease in an individual comprising the steps of

a) obtaining a sputum sample from the individual, wherein the sample comprises lower respiratory tract secretions;

b) determining the level of elastase in the sputum sample by contacting the sputum sample with a chromogenic substrate of elastase; and

c) comparing the level of elastase in the sample to a reference standard, wherein an increase in the elastase level over the reference standard is indicative of bacterial induced exacerbations of chronic lung disease; nor a method for diagnosis of bacterial exacerbations of chronic lung disease in an individual comprising the steps of

a) obtaining a sputum sample from the individual, wherein the sample comprises lower respiratory tract secretions;

b) determining the presence or absence of elastase in the sputum sample by contacting the sputum sample with an absorbent carrier coated with a chromogenic substrate therefor, wherein a change in color of the absorbent carrier is indicative of bacterial induced exacerbations of chronic lung disease as claimed in the present invention.
